

# 4x4 System

## Straight Section – 4" H x 4" W

The unique four-channel design of the 4x4 FiberGuide® straight section allows the standard system to be attached to the support structure without the need to cut or drill any holes within the trough. This ensures that the patch cords will not come in contact with any screw heads or bolts, an important consideration in 4x4 systems where higher cable counts apply increased pressure on patch cords at the bottom of the trough.

**Horizontal Straight Section**  
(FGS-MSHS-A)

**Expandable Straight Section**  
(FGS-MVAR-A)

**Hinged Cover for Horizontal Straight Section**  
(FGS-MSNC-A)
